

Raptor Background Screening for Texas

The Raptor® Volunteer Management system, integrated with JD Palatine (JDP), saves school districts time and money by delivering the most comprehensive background screening solutions for Texas school volunteers.

The Raptor system and JDP integration:

- **Streamlines Communication:** Eliminate hundreds of status inquiry calls from volunteer applicants. The system provides instant email notifications for application submissions and cleared background checks.
- **Reduces Turnaround Time:** Reduce the average application approval process from weeks to hours. The Raptor system provides a digital solution that automatically approves applicants with no criminal history, leaving only applications with potential risk requiring hands-on review.
- **Improves Safety and Security:** Track volunteer hours and keep your schools safe. Volunteer hours begin accumulating at check-in. Every time a volunteer checks into a school, they are screened against the sex offender registries in all 50 states and a custom alert database.

Choose the package that best fits your needs. Contact Raptor for volume discounts.
