LOBBYGUARD®
A RAPTOR TECHNOLOGIES® COMPANY

The #1 Visitor Management Solution for Food Defense and Facility Security

Controlling access to critical areas of your facility is a major mitigation strategy for your food defense plan. On a given day, do you know precisely WHO is on your premises, what his or her business purpose is, when the person arrived, who is escorting the visitor, and when the person leaves?

LobbyGuard® visitor management systems give you full line of sight to every single visitor—including bad actors like disgruntled ex-employees, food fraudsters, and terrorists bent on adulterating your products. LobbyGuard enhances employee security and helps you maintain full FSMA compliance and audit readiness with robust, automatic digital recordkeeping.

- Ensure FSMA compliance and audit readiness

- Know precisely who is in your facility at any time

- Screen those who should not be allowed access into your facility

- Record every detail of each visit—including entry, exit, and employee host—and have comprehensive, enterprise-wide visitor monitoring

LobbyGuard helps ensure FSMA compliance by:
- Performing instant visitor background checks
- Screening visitors against custom watch lists
- Notifying your host employee via email or text when a visitor arrives
- Helping prevent both inadvertent and intentional visitor-related adulteration of food
- Tracking and maintaining a complete record of all facility visits

FDA FOOD SAFETY MODERNIZATION ACT
FDA

LobbyGuard solutions are user-friendly, scalable, and integrate seamlessly with your existing network. Our systems help you:

Complete thorough screening of all visitors, vendors, and contractors before granting access to critical areas of your plant.

Know precisely who is on the premises in real time across your facilities.

Automatically print badges including visitor name, photo, destination, and time stamp, for instant identification by any employee.

Track visitor arrival, exit, and employee host; instantly create a permanent record of visitor movements across the enterprise.

LobbyGuard® Small Kiosk is an affordable visitor kiosk system that easily adapts to any food industry facility entrance or front office environment. The kiosk is a Microsoft® Windows-based tablet kiosk featuring all the security, reporting, and compliance benefits of pre-installed, industry-leading LobbyGuard visitor management software. (Includes ID/barcode scanner, integrated camera, and badge printer)

LobbyGuard Large Kiosk is an all-in-one kiosk system featuring a 22" touchscreen and flexible mounting options to fit any food manufacturing or processing facility. The LobbyGuard Large Kiosk includes everything manufacturers need for high-traffic self-service visitor sign-in, sign-out, and monitoring. Powered by pre-installed LobbyGuard software, the Large Kiosk represents the ultimate in robust visitor management kiosk solutions. (Includes ID/barcode scanner, integrated camera, and badge printer)

LobbyGuard offers industry-leading remote and *on-site technical support, a standard one-year warranty or optional three-year warranty, and custom development and integration services* for food processors needing additional hardware or software features.
