

The Raptor® Difference

The Raptor Visitor Management system allows schools and districts to screen and track every individual who enters their buildings, with instant vetting against sex offender databases in all 50 states plus customized school or district databases containing custody alerts and ban lists.

Many visitor management systems offer similar functionality, but there are important differences —

FEATURES	RAPTOR	HALL PASS
Trusted by more U.S. schools than all other visitor management systems combined	✓	✗
Offers preconfigured modules for visitors, contractors, volunteers, students, and staff	✓	✗
Employs a database administrator to monitor and verify that the sex offender database is always accurate and up to date	✓	✗
Checks known aliases against the sex offender database (in addition to legal name and birthdate)	✓	✗
Provides a fully integrated 3-in-1 solution for Visitor, Volunteer, and Emergency Management—one contract to negotiate, one system to learn, one vendor to call for support, with shared data across all 3 systems	✓	✗

Raptor is a cut above the competition in terms of design and reliability, but the most important distinction between the Raptor Visitor Management system and all the others is something no one else can offer: **the Raptor partnership.**

“

The Raptor system itself is awesome!
And they provide outstanding customer support.

— Temple (TX) ISD

”

The Raptor® Partnership

Every fully implemented Raptor Visitor Management system is backed by more than two dozen dedicated technical support and client services staff members ready to answer questions and solve any problems within minutes.

In addition, Raptor takes school data security very seriously. Raptor believes that all captured data is property of the client school or district. Raptor Technologies® retains client data until receipt of a written request from the client to delete. No school or visitor data is ever shared with third parties.

Raptor invests continuously and heavily in ongoing research and development in order to deliver the best, most reliable, most accurate, and most effective school security systems to our clients. We always strive to provide our partner districts with a full range of integrated school safety solutions.

“

Raptor's support people really take the time to walk you through the system and make sure that you understand. Very helpful and friendly!

— Brevard (FL) Public Schools

”

Become a Raptor partner and have confidence in the security that the market leader in school safety technologies can provide.
