

# K-12 STUDENT MODULE

## Track student tardies & dismissals

Track both tardies and early dismissals and know that you are releasing students only to approved guardians with the Raptor® Visitor Management Student Module.

### ACCURATELY TRACK TARDIES

Search by student name or ID number to quickly display a student's record and mark the student tardy. You can select from a customizable list of reasons—missed bus or overslept, for example—and choose whether to print a tardy slip.

### TOO MANY TARDIES? RECEIVE AN ALERT

When a student accumulates a certain number of tardies—a number you can set—a Tardy Alert is displayed, showing the student's tardy record and letting you choose whether a consequence should be given, like notifying guardians or assigning detention. You can customize and print detention slips at the click of a button.

### CONFIDENTLY RELEASE STUDENTS

Raptor instantly screens guardians against the sex offender registry in all 50 states and any locally customized databases, including custody databases, every time they sign out a student. You can be confident that you only release students to approved guardians. The Raptor system can quickly print early dismissal slips.

### KIOSK MODE FOR SELF SIGN-OUT

Approved students and guardians can use the kiosk to quickly sign out. Students simply scan their IDs, while guardians use the Quick Find feature to find the student record. Guardians are instantly checked against the databases before sign-out.

### ACCURATE RECORDS & REPORTS

Student details and sign-in/sign-out records are recorded, so you can quickly create customizable reports such as student detentions by date, sign-in/sign-out history, and tardy count by student.

#### Tardy Alert

Tardy totals since last reset (12/11/2018)
